Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of a system which allows a user to select an image to be erased in the memory of a camera in which the camera determines if the image is associated with other images. However, the prior art does not teach a system which allows for collectively erasing a selected image with all of its related images in a panoramic group. Although Thomson teaches collectively erasing associated files in a system concerned with storing related program and system files, this system does not teach or suggest collectively erasing all images associated with a panoramic image when a user attempts to delete an image associated with a panoramic image. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
